ABOUT THE ICGET SERIES

The International Conference on Global & Emerging Trends (ICGET) series is a forum for showcasing leading visionary, multidisciplinary research, developments, and technologies. It provides a platform for presenting the latest work, products, and systems related to global changes in the human society and technological advancements. The ICGET series focuses on the following key areas:

- Promoting industry-academia & interdisciplinary collaborations.
- Encouraging laboratory-to-market transitions of research outputs.
- Supporting budding researchers for mentorship and publications.
- Creating a platform to nurture & promote research dissemination .
